Climate Change

There is almost a universal agreement amongst independent scientists that climate change is real, is the great environmental challenge facing the world today, and that the only real debate should be what to do about it.

The main climate change gases which make this happen are water vapour and carbon dioxide. As humans put more carbon dioxide and other greenhouse gases into the atmosphere the Greenhouse Effect becomes stronger. This causes the global climate to change unnaturally. Amounts of carbon dioxide and other greenhouse gases emitted by human activity has increased significantly as we have become more and more dependant on fossil fuels. The Greenhouse Effect will change the climate in North West England in many ways, including warmer temperatures, wetter winters, drier summers and droughts and higher sea levels. For more information on climate change and the North West visit <http://www.nwra.gov.uk>. The social, economic and environmental costs of climate change could be high.

There are many ways in which the public and private sectors can help, including reducing fossil fuel power through energy efficiency, increasing support for renewable energy sources, and reducing petrol and diesel use by choice of how we travel.

More effort is needed to meet the UK 2010 goal of reducing emissions by 20% below 1990 levels. Transport in Greater Manchester is a major and fast growing source of greenhouse gases.

GMPTE has pursued a twin track approach to air quality and climate change issues by encouraging the use of public transport itself. Using electricity from renewable sources would reduce fossil fuel use and also reduce street level local air pollution.

Why not do your bit by making the 'Manchester is My Planet' pledge?

Local Link

- Local Link is a door-to-door public transport service which you book in advance;
- it is a shared service, so you may be travelling with other passengers; and
- there is no age restriction.

NEW Booking centre now OPEN

To use the East Manchester Local Link service, pre-book your journey by ringing **0844 800 9504** (local rate)
